Summary

I am a 2nd-year B.Tech student specializing in Information Technology at KIET Group of Institutions, Ghaziabad. I have a strong foundation in frontend web development, with proficiency in HTML, CSS, and JavaScript. My passion lies in creating intuitive and responsive user interfaces, and I am continuously honing my skills to stay updated with the latest trends and technologies in web development. In addition to web development, I am also developing a strong understanding of Data Structures and Algorithms (DSA) using C++. I am eager to apply my skills in real-world projects, collaborate with industry professionals, and contribute to impactful software solutions.
